

The AACE International – Delaware Valley & New Jersey Sections Present:

“Deltek Acumen 360 – Live Webinar” Mark your calendars now for September 9, 2015

Attend the AACE International joint meeting (Delaware Valley & New Jersey Sections) on September 9th 2015 to learn about Deltek Acumen 360. An unachievable timeline or an unforeseen delay can easily turn a successful project (on time and under budget) to a failed project (finishing late and over budget). Now with Deltek Acumen 360 you can have a 360 degree view of your scheduling possibilities. Acumen 360 allows you to identify possible acceleration schedules to bring your project in earlier or identify paths for completing earlier during the planning stage. Simulate dozens of “What If” Scenarios in real time. Deltek Acumen 360 allows acceleration cases, best and worst-case scenarios, impacts of delays and possible recovery scenarios to be quickly identified. After the user inputs are made an intelligent CPM engine runs thousands of simulations that attempt to meet the defined goals over and over again. The automatically created schedule scenario can then be easily exported to Primavera or Microsoft Project. Acumen 360 was designed with Deltek’s vast experience. For decades Deltek has been a leading global provider of enterprise software and information solutions for over 16,000 organizations and 2 million users in over 80 countries. Professional service firms and government agencies have relied on Deltek to research and identify new opportunities, win new projects, optimize resources, streamline operations and deliver profitable projects. Join us and Learn more about Deltek Acumen 360.

Presenter: Alex Lemuz (Deltek)

Alex Lemuz began introducing Pertmaster to the US market in 2005. Soon after Pertmaster's acquisition by Oracle, Alex took advantage of speaking opportunities throughout Latin America. He conducted sessions on project management best practices including risk assessments and cost and schedule integration. With 10 years of experience in software for the project team, Alex now works with teams in the oil and gas, EPC, and heavy construction industries across the Gulf region.
